PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 7+ years of experience architecting and delivering scalable web and mobile applications across Laravel, Ruby on Rails, Flutter, and cloud platforms. Proven remote team lead with experience managing cross-timezone Australian engineering teams in the healthcare domain. Expertise in performance optimization, RESTful API design, and CI/CD pipelines. Seeking a senior remote or local role where I can drive technical excellence and business impact.

TECHNICAL SKILLS

Backend: Ruby on Rails, Laravel, PHP, Python

Frontend: React, Vue.js, Ionic, Flutter, Blade

Databases: PostgreSQL, MySQL

Cloud & DevOps: AWS (EC2, RDS, S3, Lambda), Docker, CI/CD Pipelines, Heroku, GCP (Firebase, App Engine)

Tools: Git, Postman, Datadog, Grafana, RSpec, Agile/Scrum

Mobile: Flutter, Ionic, Android (Java)

WORK EXPERIENCE

Lead Developer | [Curve Tomorrow](#)

Jan 2025 – Apr 2026 • Remote • Australia

- Led a remote cross-timezone team delivering a scalable healthcare platform supporting appointment booking, teletherapy, and patient management
- Architected and deployed backend systems on AWS (EC2, RDS, S3) and Heroku, improving system reliability and uptime
- Reduced API response time by over 50% through query optimization, caching, and elimination of N+1 queries
- Reduced deployment time significantly by designing and implementing structured CI/CD workflows
- Collaborated directly with Australian product and design teams, managing delivery across multiple time zones

Note: Role concluded due to company restructuring — strong reference available

Senior Full Stack Developer | [Tricloud Technologies](#)

Jan 2021 – Dec 2024

- Built and scaled 10+ production applications across Laravel, Ruby on Rails, Ionic, and Flutter serving thousands of active users
- Designed and developed high-traffic RESTful APIs handling concurrent requests with optimized database query performance
- Integrated third-party services including Stripe payment gateway, real-time push notifications, and SMS services
- Improved database performance for large datasets by redesigning queries and introducing indexing strategies
- Collaborated with cross-functional teams (frontend, product, design) to deliver responsive, high-performance interfaces

Software Engineer | [Crosshair Technology Lab](#)

Apr 2019 – Dec 2020

- Built backend systems and RESTful APIs for multiple client projects using PHP and Laravel
- Developed multiple mobile applications from scratch using Ionic and Android (Java)
- Delivered scalable features under tight deadlines in an agile, fast-paced environment

- Developed Android applications in Java, including Pakistan Selfie League and Ask Aalim

KEY PROJECTS

Interpreter Booking Platform — Ruby on Rails + Angular

- Reduced backend processing overhead by 70–80%, improving API response time from ~12s to 2–3s through N+1 query elimination and eager loading
- Redesigned interpreter matching flow using intelligent filtering and heuristic scoring based on proximity, availability, and relevance
- Improved user experience significantly under high-load scenarios through architectural redesign

Health Agent — Ruby on Rails + Ionic + AWS + AI

- Built a full-stack healthcare platform from scratch supporting appointments, teletherapy, and AI-based doctor search
- Designed scalable AWS architecture for real-time patient interactions and secure data management

Digital Dope — Ruby on Rails + Ionic + Web3

- Developed a crypto marketplace with NFT minting, trading, and MetaMask wallet integration
- Implemented smart contract interactions and built scalable backend systems for user assets and transactions

Other Notable Projects: Let's Roof (Rails + Flutter + AWS) • Discount Distributors (Ionic + Stripe) • BRWN BAGS (Flutter + Rails) • Cross Promotion Management System (Laravel) • Moodle Mobile App (Ionic + Firebase) • Xantos (Flutter + Elixir)

KEY STRENGTHS

- Proven remote team leadership across time zones with strong async communication skills
- Deep expertise in performance optimization — consistently delivering measurable improvements in API speed and system reliability
- Strong ownership mindset with focus on quality delivery and business impact
- Healthcare domain experience with sensitivity to data security and compliance requirements
- Effective cross-functional collaborator across frontend, product, and design teams
